

DISCOUNT STATISTICS OF CLOSED-END FUNDS UPDATE FOR THE 1st QUARTER 2008

This article will update the Highland Global study, "Discount Statistics of Closed-end Funds," (originally published in November 2005 and updated quarterly) for data relating to the first quarter of 2008. The original article with more details regarding discount statistics of closed-end funds is available at www.HighlandGlobal.com.

Barron's Closed-End Fund Data

Each quarter, Barron's Online (www.barrons.com) reports statistics on publicly-traded closed-end funds. The statistics reported include the discount (or premium) of the market price from the fund's net asset value (NAV), the 52-week average discount or premium, the fund's objective, and various return measurements, etc. Highland Global then calculates the discount range, average, median, and standard deviation and reports these figures based on metrics such as the total data population, beta ranges, fund objectives, etc.

For the first quarter ending March 31, 2008, 571 closed-end funds traded at a discount to their NAV. For the fourth quarter ending December 31, 2007, 597 closed-end funds traded at a discount to NAV. For the first quarter of 2008, the average discount to NAV was 9.3% with a median of 9.8% and a standard deviation of 3.7%. For the fourth quarter of 2007, the average discount to NAV was 9.6% with a median of 10.2% and a standard deviation of 3.6%.

For the fifty-two weeks ending March 31, 2008, 545 closed-end funds traded at a 52-week discount to NAV. As of December 31, 2007, 543 closed-end funds traded at a 52-week discount to NAV. For the fifty-two weeks ending December 31, 2007, the average discount was 6.3% with a median of 6.1% and a standard deviation of 3.7%. For the fifty-two weeks ending March 31, 2008, the average 52-week discount was 6.6% with a median of 6.7% and a standard deviation of 3.7%.

For the first quarter 2008, the discount to NAV ranged from 0.0% to 27.3% with the 52-week discount ranging from 0.1% to 30.8%. For the fourth quarter 2007, the discount to NAV ranged from 0.1% to 39.2% with the 52-week discount ranging from 0.1% to 27.4%.

Morningstar's Beta Data & Barron's Closed-End Fund Data

Morningstar (www.morningstar.com) reported betas for 498 of the closed-end funds with discounts to NAV for the first quarter 2008 as compared to 506 closed-end

funds with discounts to NAV for the fourth quarter 2007. For the fourth quarter 2007, the betas ranged from -2.53 to 2.41. The betas ranged from -2.93 to 2.83 for the first quarter 2008.

The following table provides the average and median discounts for the entire population and for those closed-end funds with reported betas for the first quarter ending March 31, 2008 as compared to prior quarters.

The descriptive statistics presented in the previous tables may be useful in helping the analyst determine an appropriate baseline discount from which adjustments may be made to determine the final discount applicable to the minority interest being valued. In the end, however, the analyst always must use reasoned and informed judgment in determining the appropriate baseline discount and the adjustment from that baseline to reflect the particular risk characteristics of the minority interest being valued.
